

Support for alternative and renewable liquid and gaseous fuels forum (policy and market issues)

ART Fuels Forum

EUBCE 2018

26TH EUROPEAN BIOMASS CONFERENCE & EXHIBITION

EU Policy and Industry Perspectives on Biofuels in a Global Context

Bella Center, Room 19
Copenhagen

Monday 14th of May, 14:30 to 17:00

Description of the Workshop:

Biofuels constitute one of the key pillars in the efforts for sustainable economic development and significantly contributes to the mitigation of climate change. The aim of this workshop is to promote the dialogue between the European Industry of Advanced Biofuels and the EU Policy-makers and the related institutions. The key objective is to communicate the capabilities and the needs of the relevant industry under the global perspective of the wider deployment of the Advanced Biofuels and to highlight the opportunities and threads stemming from the policy framework. International organizations active in the field will participate: IRENA, FAO, IEA, ETIP-Bioenergy.

The Workshop is structured in two sections. The first part comprises a few presentations from ART Fuels and International Organisations on the global dimension of the Advanced Biofuels, while during the second part a moderated panel discussion will take place among representatives of the the sustainable, advanced, alternative and renewable transportation fuels (ART Fuels) industry, focusing on the benefits and market uptake potential of the ART- Fuels.

The event will be concluded with a discussion with the audience and a Q&A session.

The event is organized by the ART Fuels Forum, which brings together more than 100 experts representing the value chain for alternative transportation fuels and facilitates discussions on policy and market issues for these fuels.

AGENDA

Introduction to the event

14:30 - 14:40

Welcome – Short Introduction to the ART-Fuels Forum Project and the Workshop

Chairmen:

Kyriakos Maniatis, DG ENER - ART Fuels Forum

Theodor Goumas, EXERGIA - ART Fuels Forum

14:40 – 15:30

The Global Dimension of Advanced Biofuels

FAO, Olivier Dubois: Availability of resources

IRENA, Jeffrey Skeers: recent findings from IRENA studies

IEA, Paolo Frankl: The 2017 Bioenergy Roadmap

ETIP-B, Arasto Antti: Technology Needs in Advanced Biofuels

ART Fuels Forum, Eric Van den Heuvel: Policy Needs and Industry Perspectives

15:30 – 16:15

Panel discussion on benefits and market uptake potential of the ART-Fuels in the global context

Moderator: *David Chiaramonti, RE-CORD - ART Fuel Forum*

Panelists:

Anselm Eisentraut, Neste Oy

Marko Janhunen, UPM

Lisa Hanke, Enerkem

Nour Amrani, Novozymes

Paolo Corvo, Clariant

Gerard Ostheimer, below50

16:15 – 16:50

Discussion with the audience and Q&A session

16:50 – 17:00

Conclusions (chairmen) & Closure of the event

Theodor Goumas, EXERGIA - ART Fuels Forum
